R222

Asia Pacific Region

A heavy duty rubber case makes the R222 ideal as a non-conductive lighting tool for electrical applications. In addition, it meets IEC 60529 IPX4 standards for water resistance.

A built-in lanyard and clip easily hangs the light from nearby pipes or other extrusions and its small size is convenient in tight areas. With an improved, faceted reflector you can count on this light for a wide, high-quality spot.

Before Using Your Flashlight:

Please read all instructions and cautionary markings on the package and light
