

Enecharger's NC500U is ideal for NiCd & NiMH battery packs consisting of 4 to 10 cells.

**SMART  
CHARGER**

**4.8V-12.0V**

The NC500U Smart Charger provides a simple plug and play charging solution for your 4.8V to 12V NiMH & NiCd battery packs.

500mAh output, auto voltage recognition and delta peak cut-off ensures your battery packs are charged to the optimum level.

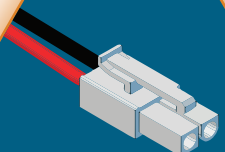

With auto cell detection, reverse polarity and short circuit protections built in, this charger will provide safe operation to maximise battery service life.

**Fully  
Automatic**

**LED  
Indicators**

**Tamiya  
Style Plug**

**110-240VAC  
Input**

**Female Tamiya  
Adaptors Available**
